

PRICE LIST

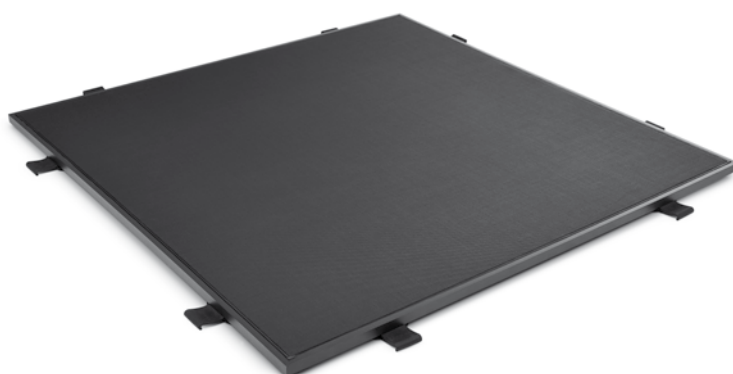

fixed outer sunblind for Skylux glass skylights

Thanks to a simple clip system, you can easily install the high-quality outer sunblind on your Skylux flat glass skylight. The sunblind prevents the glass from heating up and reduces the amount of solar heat entering your home. As a result, you can enjoy a continuous pleasant temperature indoors.

Removing the sunblind is also a breeze. You can choose to take off the sunblind during the cold winter months.

The Skylux® fixed outer sunblind is compatible with iWindow2, iWindow3, iWindow2 Flex and iWindow3 Flex:

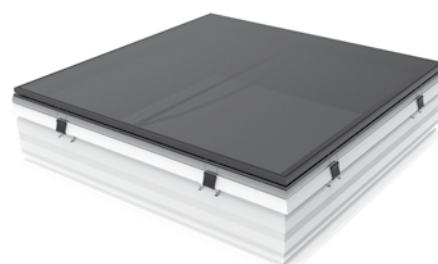

- Excellent protection against sunlight
- Modern and solid design
- Easy to install and to remove
- Saves energy
- Reduces contact noise from rain and hail
- Highly resistant against wind

Please always mention the type of the glass skylight on your order: iWindow2, iWindow3, iWindow2 Flex or iWindow3 Flex
